

# Undergraduate Research Opportunity with the Bilingualism Research Group

Are you an undergraduate student seeking research experience? Are you curious about how language experience and cultural identity influence how bilinguals use their languages? Would you like to learn how EEG is used to study brain activity during language processing?

Our Research Group studies how bilinguals process language and think, using both psycholinguistic and sociolinguistic methods. We are currently seeking students to join us on two upcoming projects!

## Project 1: Code-switching in Cantonese-English bilinguals!

- ✓ Bilingual in both Cantonese and English; can speak and understand both languages.
- ✓ Written knowledge in Chinese characters is a plus but not required.

## Project 2: EEG processing in French-English bilinguals!

- ✓ Proficiency or some knowledge of French is preferred.
- ✓ Ability to commit at least 6 hours per week for three quarters.

### For both positions:

- ✓ \*\*\*Enthusiasm for linguistics research.\*\*\*
- ✓ Prior research experience not required.
- ✓ Major or minor in Linguistics, East Asian Studies, Psychology, or related fields preferred but not required.

## How to apply?

Fill out the RA application. If you have questions, please reach out to Dr. Ariel Chan at [arielchan@stanford.edu](mailto:arielchan@stanford.edu)

Options to enroll in LINGUIST 199 Independent Study (2-4 units) or  
Federal Work-Study hourly pay (if eligible for FWS).
